

# Secure Hosted Exchange

Quest Technology Group's Secure Hosted Exchange, which utilizes its innovative Customer Portal, eliminates capital expenditures, management overhead and the complex processes businesses face as they manage their messaging environments.

## Features & Benefits

- Easy, Web-based Access
- Unlimited Storage
- Embedded Spam and Virus Protection
- Optimized Performance. Quest Technology Group utilizes Akamai IP Acceleration Technology, which dynamically plots the fastest path between user and e-mail, thereby assuring users will always have quick and reliable access to Outlook, Outlook Web and Mobile Device applications, regardless of location or what is happening on the Internet. The result? Faster Internet. Increased Mobility. High Availability
- Simple administration tools help manage e-mail routing, aliases, groups, users, mailbox storage, forwarding, passwords and client configuration in real time
- Windows Server Configuration and Active Directory are not required
- Migrate users at their own pace with "Domain Routing" and "Outlook Configuration" features
- Experience all the features of OWA, including mail notifications, calendar reminders, public folders, contacts, tasks, SharePoint documents, and global address list access
- Empower end users (and save administrative time) by allowing them to set up accounts, access email settings for mobile devices, view mailbox usage and reset their own passwords
- View live spam statistics and zero-hour virus alerts
- Supported with 24 x 7 Phenomenal Customer Care™
